Linear LED light fittings (Zone 2 and 22)

The efficient LED solution for your explosion protected lighting engineering

The series of light fittings nLLK 15 LED for Aura UltiLED (Pro) long life LED tubes combines latest lighting engineering with the requirements of harsh and hazardous environments.

This luminaire series is available both as surface-mounted luminaire (nLLK) and as pole-mounted luminaire (nLLM) in various sizes.

The explosion protected luminaires are approved for use in gas- and dust-Ex-areas fulfilling the requirements of the ATEX directive 2014/34/EU.

They are designed and tested according to the latest standards for Ex-equipment for use in Zone 2 gas Ex-areas and Zone 22 of dust Ex-areas.

The nLLK 15 LED luminaires are helping to increase your safety and save energy. The clear energy saving and the higher quality of lighting are made by use of Aura UltiLED (Pro) long life LED tubes in combination with a special designed electronic driver that will sustainably reduce your cost of operations.

A reliable decentralized emergency lighting

The luminaires with a self-contained battery system provide a decentralised solution for the emergency lighting, independent of central systems. In large plants in particular, these luminaires can offer significant cost benefits. The battery is located below the reflector flap within the 1/6 version. A separate battery enclosure is used within the version 2/6. The emergency light operating time is 1.5 or 3 hours.

Central controlled emergency lighting systems with V-CG-S

The V-CG-S light fittings can be connected to a CEAG emergency lighting installation with monitoring system.

This means, that the nLLK 15 LED V-CG-S can be integrated as a system light fitting into the practical monitoring system of CEAG group or central battery installations.

Special feature of the nLLK 15 LED V-CG-S: 100 % light output in emergency mode; both LED tubes are on!

Easy and economically to install

The standard single-sided through-wiring architecture in conjunction with the generously large terminal compartment offers a cost efficient installation. Double-sided lock with latch points allows the protective bow to be hingeable on both sides meaning the fitting can be mounted without having to pay attention to which side is the correct side.

DALI light control

The nLLK 15 LED DALI can be individually controlled and dimmed. This light fittings have an integrated DALI interface for the connection of a 2-wire control line.

Options

The series of light fittings nLLK 15 LED optionally is also available with integrated light switch. This switch automatically ensures the all-pole disconnection from mains of the open light fitting.

We also offer special LED tubes, which are splinter-protected by plastic and therefore ideal for use in the food industry (on request) and protective covers with green light filter (on request).

Features

- Replaceable driver and light source
- Self-contained battery version available
- Connection to CEAG emergency light monitoring systems available (V-CG-S)
- Light controlling via DALI interface as option (DALI)
- Cost efficient installation due to single sided through wiring
- Easy maintenance by double sided safety lock
- High lumen output
- High degree of protection IP 66
- Available with safety switch on request
